7) Select the type of Lock you want to use e.g. **DIRECTIONAL**

8) Fill in your **STORY** and upload an **image** or text file

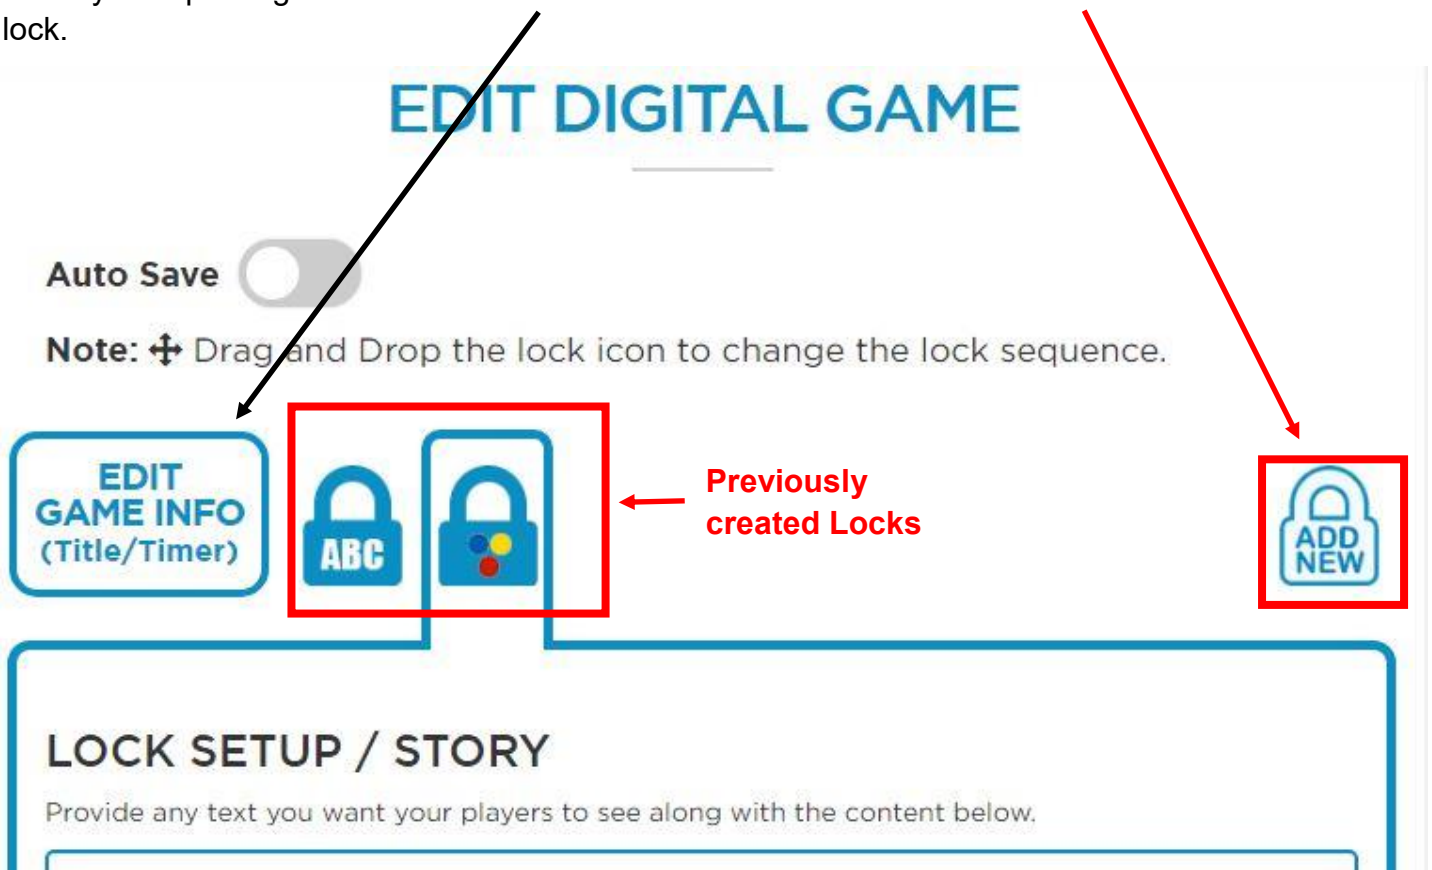

9) Enter the correct **LOCK CODE (COMBINATION)** using the onscreen buttons

The screenshot shows a lock interface. At the top, there is a map of Australia with a red arrow pointing to Brisbane. Below the map is a compass rose. A blue button reads "SELECT A FILE FROM YOUR COMPUTER" with the text "Images must be 5MB or smaller." below it. The main area is titled "SELECT THE DIRECTIONS THAT WILL OPEN THE LOCK" and contains four square buttons with arrows pointing up, down, left, and right. Below this is a horizontal line and the text "SELECTED COMBINATION". Underneath, five circular buttons show the selected combination: down, right, down, right, down.

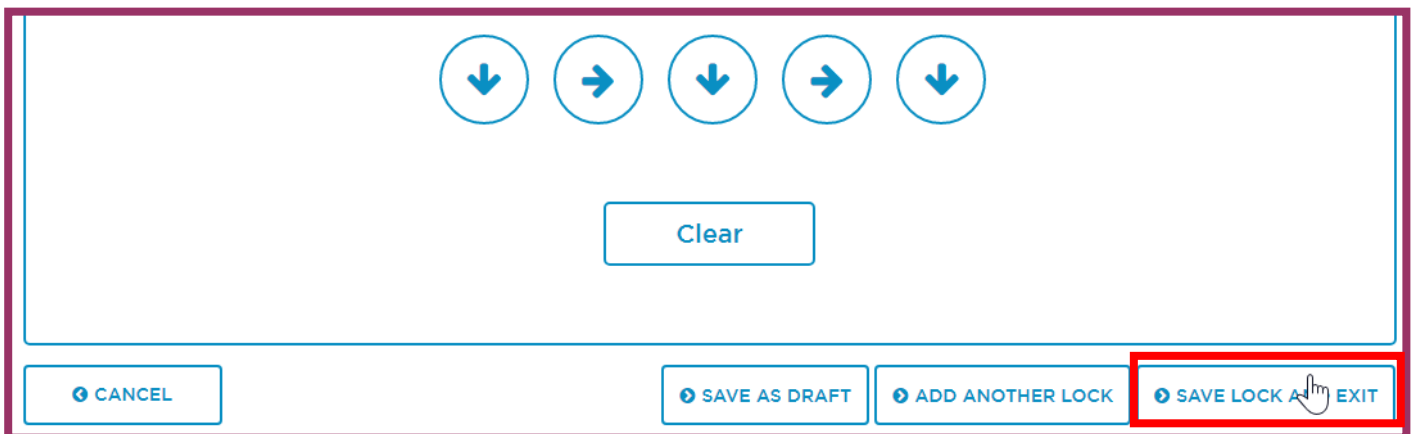

10) **Save** your **Lock and Exit**, **Save as Draft** or **Add Another Lock**

The screenshot shows the bottom part of the lock interface. It features five circular buttons with arrows pointing down, right, down, right, down. Below these is a "Clear" button. At the bottom, there is a menu with three buttons: "CANCEL", "SAVE AS DRAFT", and "SAVE LOCK AND EXIT". The "SAVE AS DRAFT", "ADD ANOTHER LOCK", and "SAVE LOCK AND EXIT" buttons are highlighted with a red border.

10) When you edit as previously saved (but NOT submitted!) game you see the **Locks** you have already set up alongside the **EDIT GAME INFO** tab. You can click on **ADD NEW** to start a new lock.

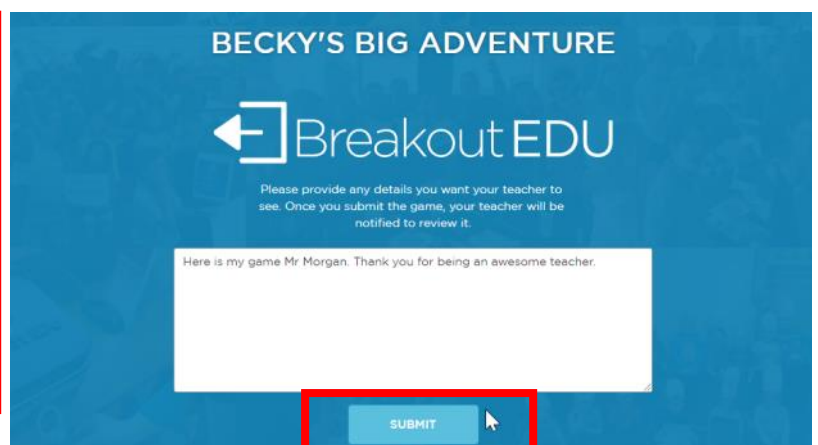

11) **Save** your Lock or add another one.

11) When you have finished your Game **SUBMIT** it so your Teacher can check it and the allocate it to your classmates for testing.

Remember though - once it has been submitted you cannot edit it, so make sure it is correct!

Playing another students Digital Game

1) Once a student has submitted a Gam design it will show in the Submitted Games folder of the student and the teacher. It is now waiting to be **Reviewed** by your teacher.
